SMART HMIS - Unique Features

SMART-HMIS

Amazing Technology. Extraordinary Care

Modules In scope for Implementation | Full Stack

Core Modules : OP - Clinical

1. FRONT OFFICE
2. OPD / CPOE
3. PHARMACY
4. LAB
5. BILLING MODULES
6. EMERGENCY & DAY CARE DEPARTMENT
7. DIETICIAN
8. DIALYSIS
9. VACCINATION
10. PHYSIOTHERAPY
11. RADIOLOGY
12. HEALTH CHECK UP PACKAGES
13. VITAL ROOM MANAGEMENT
14. MOBILE APPS – DR (ANDROID & IOS)
15. MOBILE APPS – CUSTOMER (ANDROID & IOS)
16. TELEMEDICINE
17. FERTILITY
18. PROCEDURE CONSOLE

Core Modules : IP

1. ADMISSION
2. DISCHARGE
3. NURSING STATION MODULE
4. ANDROID MOBILE APP FOR NURSING STATION
5. BILLING MODULES
6. OPERATION THEATRE
7. LABOUR ROOM
8. BLOOD BANK
9. IP PACKAGE
10. MOBILE APPS – DR (ANDROID & IOS)

Core Modules : Non-Clinical

1. CASH COUNTER
2. ASSET MANAGEMENT
3. DIGITAL MRD
4. DOCUMENT MANAGEMENT
5. PURCHASE
6. STORES/INVENTORY
7. CONSIGNMENT
8. CONSUMPTION ENTRY
9. ACCOUNTS
10. HR & PAYROLL
11. MOBILE APPS – UTILITY (ANDROID)
12. REPORTS
13. B2B BILLING
14. AMBULANCE MANAGEMENT

Enabler Modules

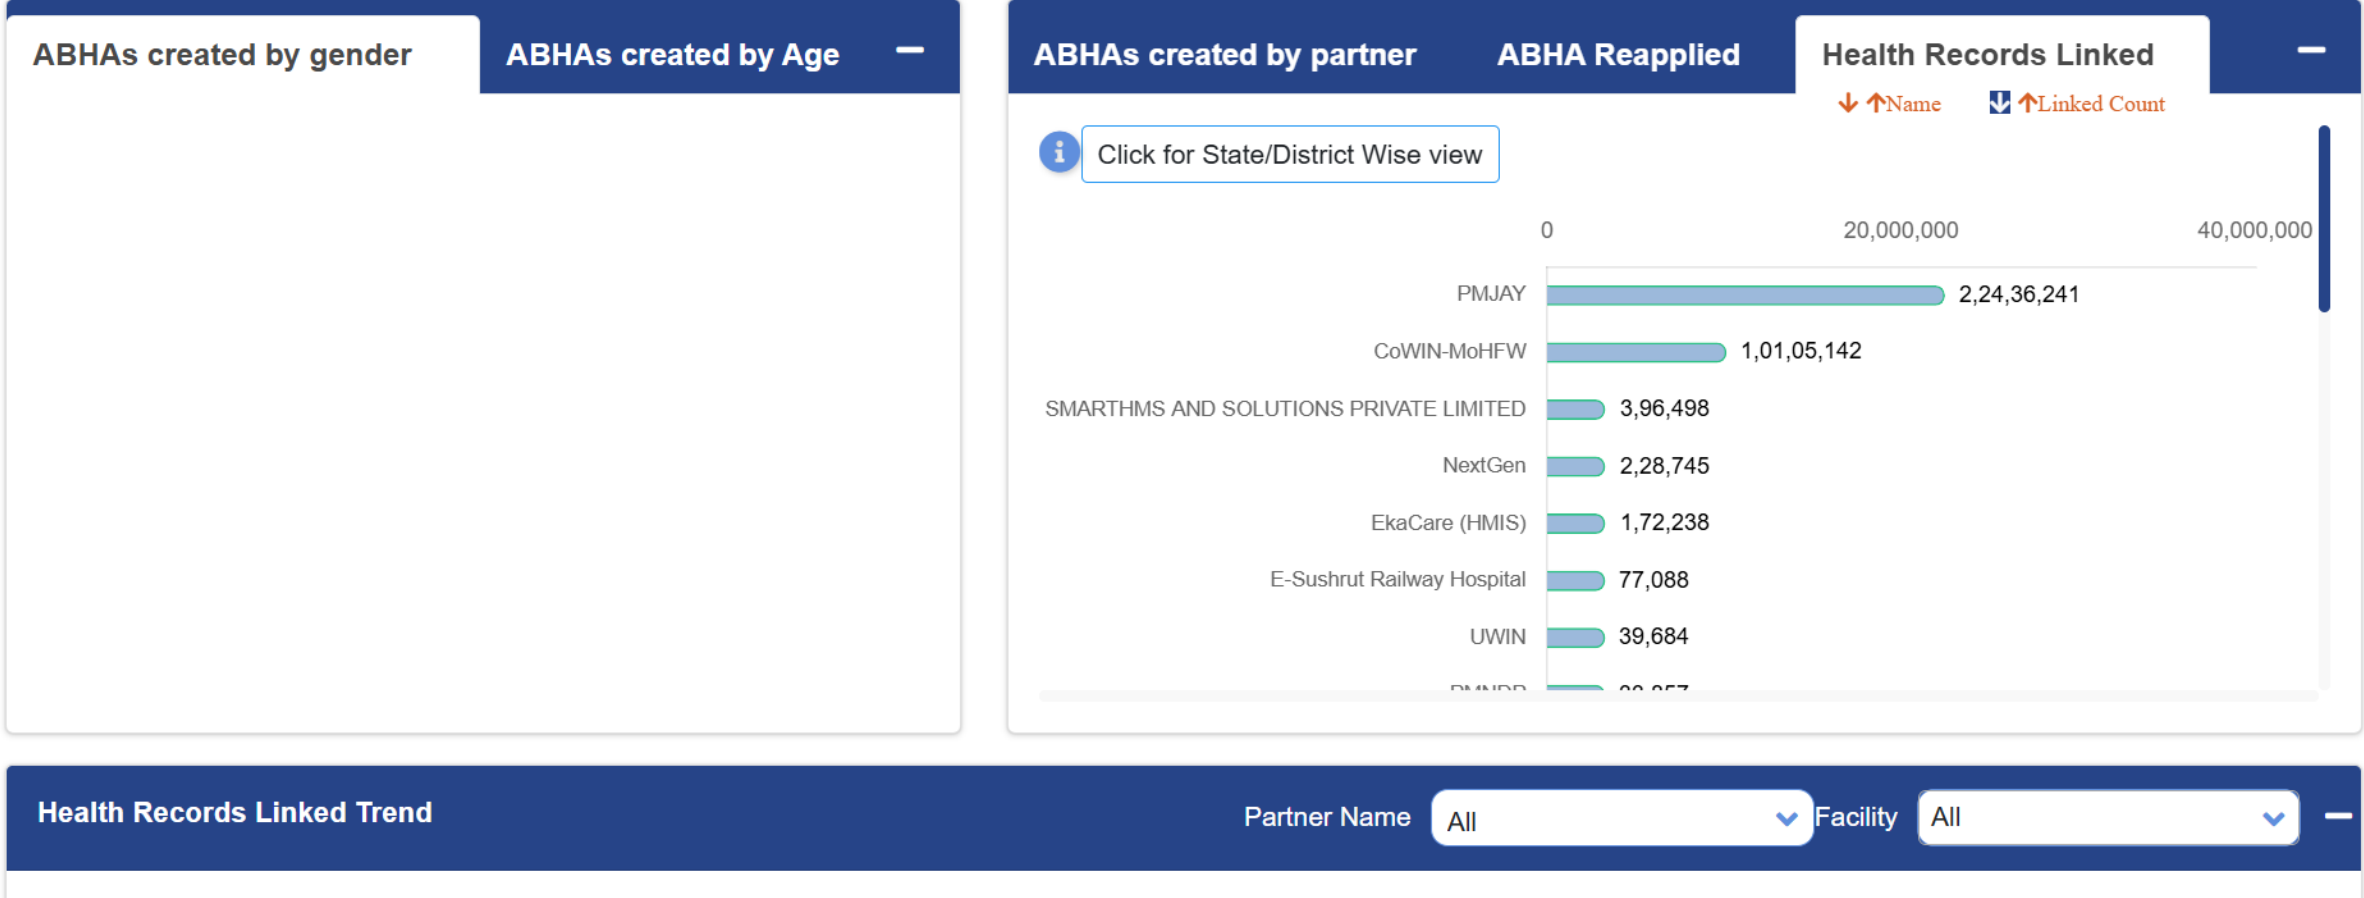

1. DATA ANALYTICS
2. INSURANCE MODULE
3. CSSD MODULE
4. LAB MACHINE INTEGRATION DIU UTILITY
5. PRINTER INTEGRATION
6. TV OUT PUT INTGERATION
7. QUEUE MANAGEMENT SYSTEM
8. PACS INTEGRATION
9. GATE PASS & BYSTANDER PASS MANAGEMENT
10. COMPLAINT MANAGEMENT
11. CANTEN MODULE
12. SMS & WHATSAPP INTEGRATION
13. WEBSITE INTEGRATION

Case Studies : IQRAA Hospital (18 Branches)

Context :

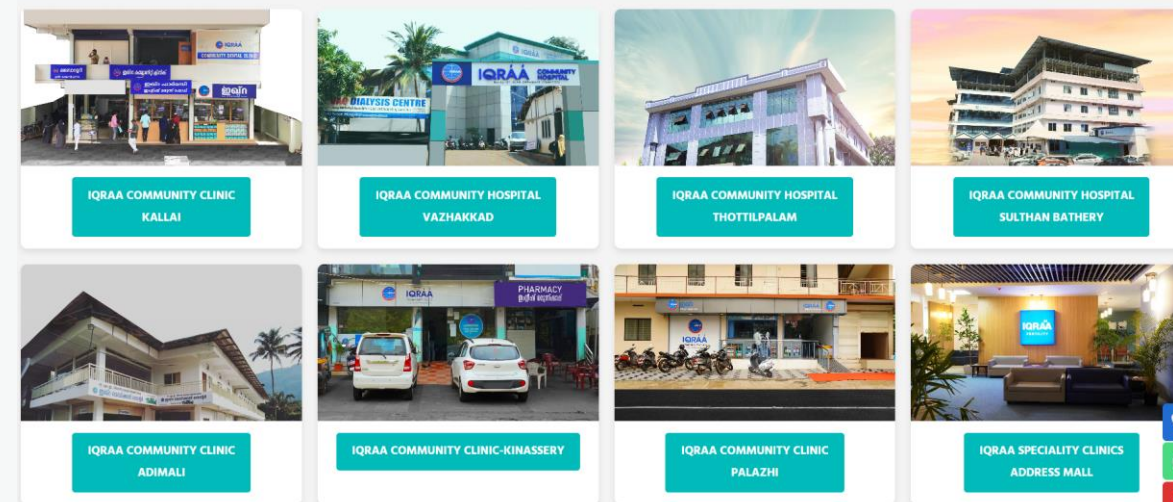

- ✓ **IQRAA:** 430-bed hospital, 250 doctors, 1637 nursing & paramedical staff, 2500 OP visits daily.
- ✓ Initially operated with 3 branches, wanted to centralize branch operations and faced challenges scaling up software.
- ✓ **Mission:** Replace legacy application, centralize branch operations, migrate 10 years of data.

Key aspects of implementation :

- ✓ Successful migration of 10 years of clinical and non-clinical data.
- ✓ System went live without rollbacks, with 2500 OP visits daily, using centralized data structure, implemented in a Linux-driven environment.
- ✓ Training of senior doctors and 100% successful adoption of CPOE module

Post Go-live :

- ✓ Expanded to 18 branches, handling 5000 OP visits daily, with rapid branch implementation (within 24 hours)
- ✓ Continued support for innovations, customizations, and growth acceleration.

Case Studies : Mar Sleevea Medicity (Fully Paperless)

Context :

- ✓ Mar Sleevea: A 750-bed hospital with 44 specialties, 188 doctors, and 819 nursing & paramedical staff. | **0.6 Million Sq. Ft built up area**
- ✓ Mission: Implement a comprehensive technological solution to cater to all modern-day hospital requirements with a superior product

Key aspects of implementation :

- ✓ IT Procurement related consultations
- ✓ Training healthcare professionals of diverse experience.
- ✓ Elevated focus on mobility from the start
- ✓ 360-degree integrations: Mobile App, Web portal, Token calling, TV out, Kiosks, Queue management, 30 lab machines, PACs
- ✓ 100% adoption of CPOE module
- ✓ Implementation of advanced algorithms to address specific needs.
- ✓ Paperless solutions for the IP department implemented
- ✓ Scaling up of IT team for functional expertise.
- ✓ SMART HMIS implemented in Hyper-converged infrastructure.

Post Go-live :

- ✓ Utilized SMART HMIS system to the fullest, fully automated to handle 2000+ daily patients within 5 years of operations.
- ✓ Attached 2 satellite branches using branch architecture
- ✓ Enabled Mar Sleevea to adopt best practices and advanced automation processes.

SMART-HMIS

Amazing Technology. Extraordinary Care

Case Studies : Sabine Hospital (Funded by CX Partners)

Context :

- ✓ **Sabine:** A 200-bed hospital looking for expansion with **PE**
- ✓ Mission: Modernize the healthcare platform with advanced technology and scale with **PE** funding.

Key aspects of implementation :

- ✓ Successful migration of 7 years of clinical and non-clinical data.
- ✓ Seamless system launch without any rollbacks, handling 800 OP visits daily
- ✓ Adapted the platform to cater to specific operational procedures, including infertility treatment, IVF, and ICSI.
- ✓ **PE** funding successfully completed

Post Go-live :

- ✓ Expanded to 4 branches with total 650 bed capacity . Additional expansion plan of 15 hospitals in 2 years across India with plans to go for IPO
- ✓ Working as a health-tech partner helping with Innovation & Scaling

SMART-HMIS

Amazing Technology. Extraordinary Care

Case Studies : SP Medifort Hospital – (JCI Accredited)

Context :

- ✓ SP Fort sought an advanced and future-oriented system.
- ✓ SP Medi Fort Hospital, a 450 bedded multi Speciality hospital (**.5 Million Sq. Ft**)
- ✓ Implementation successfully completed and hospital fully operational
- ✓ Hospital is JCI Accredited

Driving the future of intelligent healthcare infrastructure.

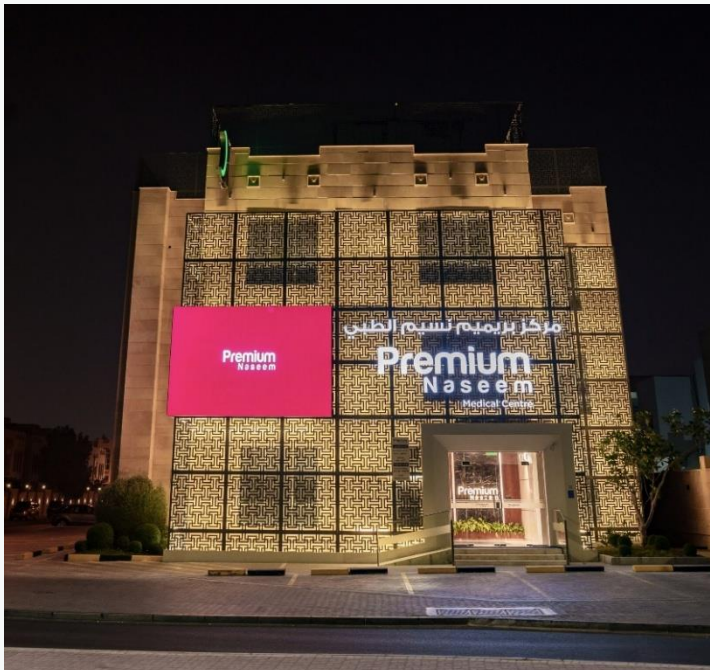

Case Studies : Naseem Healthcare- Qatar (Multi Country)

Context :

- ✓ Largest Outpatient Healthcare network in Qatar – 3000+ Ops daily
- ✓ Network Migration to a Unified Platform
- ✓ Multi country Implementation – Qatar & Tanzania

Key aspects of Implementation

- ✓ All 8 branches live with SMART HMIS. Completed network migration to a Unified Platform
- ✓ Transitioned from Standalone Applications to an All-in-One System
- ✓ Digital Transformation with paperless EMR and EHR
- ✓ All branches connected to the mother hospital through a Centralized branch architecture
- ✓ Advanced insurance workflow implemented with RCM innovation

SMART-HMIS

Amazing Technology. Extraordinary Care

Case Studies : Turkish Hospital - Qatar

Context :

- ✓ 100-bed multispecialty hospital with OP & IP services
- ✓ Staff trainings successfully completed
- ✓ Adopting SMART HMIS as an All-in-One Solution

Key aspects of Implementation

- ✓ Successful Go-live on January 2026
- ✓ QHIE Hub integration for national interoperability
- ✓ Comprehensive RCM covering OP & IP insurance workflows
- ✓ Advanced paperless insurance processing and approvals
- ✓ Automated EMR-driven claims to reduce rejections
- ✓ Centralized billing and real-time financial controls
- ✓ Streamlined discharge with mandatory clearances
- ✓ Future-ready platform enabling digital transformation

SMART-HMIS

Amazing Technology. Extraordinary Care

Case Studies in AI : RPM OccuMed Clinics- Abu Dhabi

Context :

- ✓ RPM is public listed company in Abu Dhabi – (Burjeel Holdings)
- ✓ Occumed Clinics – Offering pre-employment screenings, medical and health checkups for clients like ADNOC
- ✓ An ESG project
- ✓ Automatically generate occupational health certificates using AI technology
- ✓ Augment the doctor with accurate information on candidate fitness for work
- ✓ Enable doctors to handle more cases with improved data accuracy and precision.

Key aspects of implementation : 100k medical fitness certificates processed through our AI platform so far.

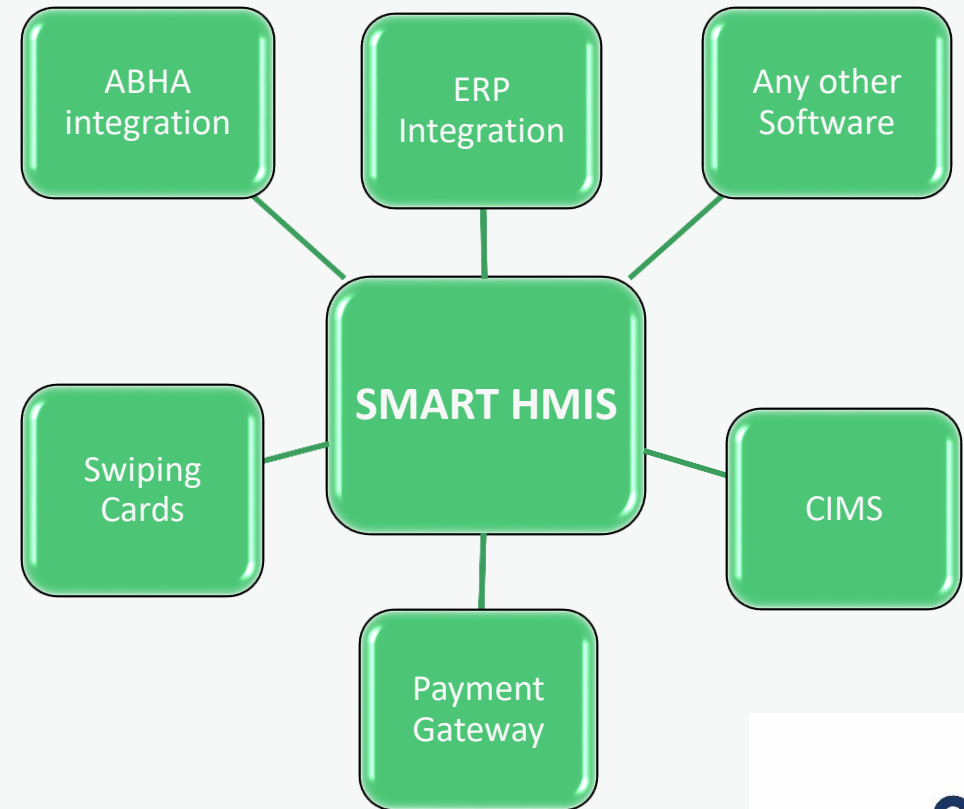

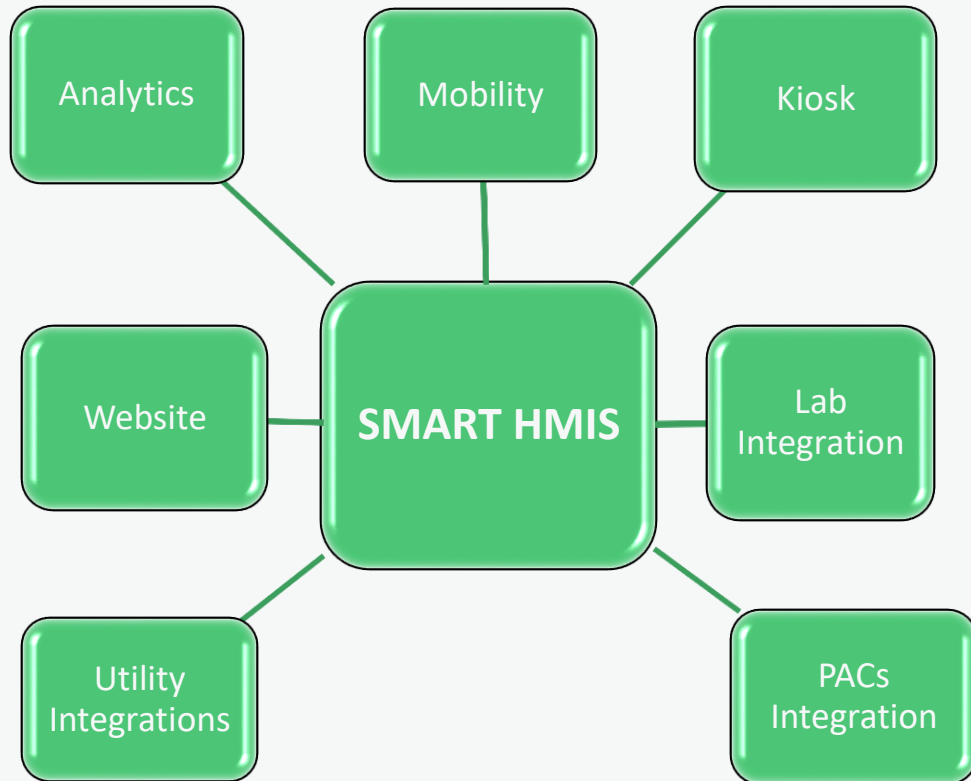

- ✓ ADHICS-Compliant AI Model: Meeting the leading healthcare standards for safety and compliance
- ✓ Data-Driven Clinical Decision Support: AI/ML model utilizes clinical data to aid doctors in decision-making
- ✓ Enhanced Safety and Accuracy: Prevents errors, avoids onboarding unfit candidates, and contributes to saving lives
- ✓ Successfully completed Go-live in January 2025.
